EXPERIENCE

Generative AI Intern | CodeTantra Tech Solutions Pvt. Ltd, Hyderabad

Short-term internship in collaboration with AICTE and APSCHE

- Built LegalGPT AI, a retrieval-augmented legal document Q&A chatbot, as the applied project component of the internship.
- Worked in a 4-person team on project design and implementation.

TECHNICAL SKILLS

Programming Languages: Java, Python, MySQL

Web Technologies: HTML, CSS, JavaScript

Frameworks: React, Spring Boot

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA

AI / ML: LangChain, Retrieval-Augmented Generation (RAG), FAISS

PROJECTS

SmartPay — Digital Wallet Application | Java, Spring Boot, React

- Built secure registration, login, and JWT-based authentication with REST APIs using Spring Boot and Spring Security, backed by MySQL.
- Implemented wallet balance management, add money, and peer-to-peer transfers with transaction history and role-based access for User and Admin.
- Deployed across Vercel, Render, and Railway, integrating a React (Vite, Tailwind CSS) frontend with the Spring Boot backend.

LegalGPT AI — Retrieval-Augmented Legal Assistant | Python, FastAPI, LangChain, FAISS

- Built a RAG chatbot answering questions strictly from user-uploaded legal PDFs, chunked with LangChain and embedded into a FAISS vector store.
- Developed a FastAPI backend with upload and chat endpoints, served by an LLM through the Groq API, with a React (Vite) frontend.
- Deployed the frontend on Vercel and backend on Render, resolving CORS, dependency, and runtime-version issues.
